We understand that most independent artists do not have a major-record-label budget. At Studio Dancini we will explore every option to lower the overall cost, and we will *never* sacrifice the quality of your final product.

## **How our remote collaboration process works**

Here's the Studio Dancini method and why we continue to raise the bar.

### **Step #1 - First and Foremost: Communication.**

*This is the key to the success of your project.* We encourage you to tell us everything about your vision, idea or upcoming project. Do you have a release schedule? A music deadline? Please inform us completely about your musical project, your hopes, dreams and expectations, the sound you want and services you require. This is critical.

With proper, clear and concise communication with all parties involved, we can set the tone together for an epic masterpiece.

We recommend using our *consult with a producer* link or the *direct contact* link to connect with a producer. Seriously. The more we know, the happier you'll be with our finished work.

### **Step #2 - Request a quote or consultation.**

We will connect with you within 24 hours, excluding all holidays and weekends.

We guarantee our work and will provide you with our expert recommendations that ensure the very best optimization of your song's potential, with a free quote and always, zero cost, obligation or commitment from you for the consultation.

Once our written proposal is accepted, we will work diligently with you to prepare all the details. Once our goals and expectations are set and clear, we will start to work on your project. Now your dream can begin its journey.
